# About Invicta.

## French foundry and enamelling plant

Based in Donchery in the French Champagne-Ardenne region since 1924, Invicta designs and manufactures a wide range of cast iron appliances: barbecues, furniture, wood/pellet-burning stoves, fireplaces inserts, and cookware.

# Choosing the right barbecue.

## Cast iron Bodies and Cooking Plates

A durable, 100% recyclable material, cast iron is ideal for heating, cooking and grilling. Advantages :

- > excellent heat conductivity; source of gentle heat.
- > high inertia : stores heat and releases it progressively.

Wood is the most economical fuel and the one which burns the hottest. Unlike steel bodies, Invicta cast iron bodies are great for wood burning barbecues. They don't distort.

## Fuels comparison

	Wood and charcoal barbecues	Gas barbecues	Gas griddles
