**ROCAL**

**MY HOME**

Rocal provides the warmth and the touch of class your home needs,

with our wood heating systems adapted to any space, environment or requirement.

We believe in a sustainable future and trust in renewable energy sources to bring comfort to your home.

# Rocal

40 years in the home heating industry /  
Thank you for being part of our journey

In 1982 a project was started with great enthusiasm and effort that has led us to be today one of the leading brands in the sector. It has not been an easy road and there is still a long way to go, but thanks to our clients and the hard work of our team, we have been able to adapt to the changes that the market demanded and demands with the objective and responsibility of caring for our environment. Both from our factory in Centelles (Barcelona) and in the products that are installed in homes around the world, we want to make this world a better place.

# From Rocal to your home

For the sale and installation of our product, we have a network of professionals in more than 40 countries.

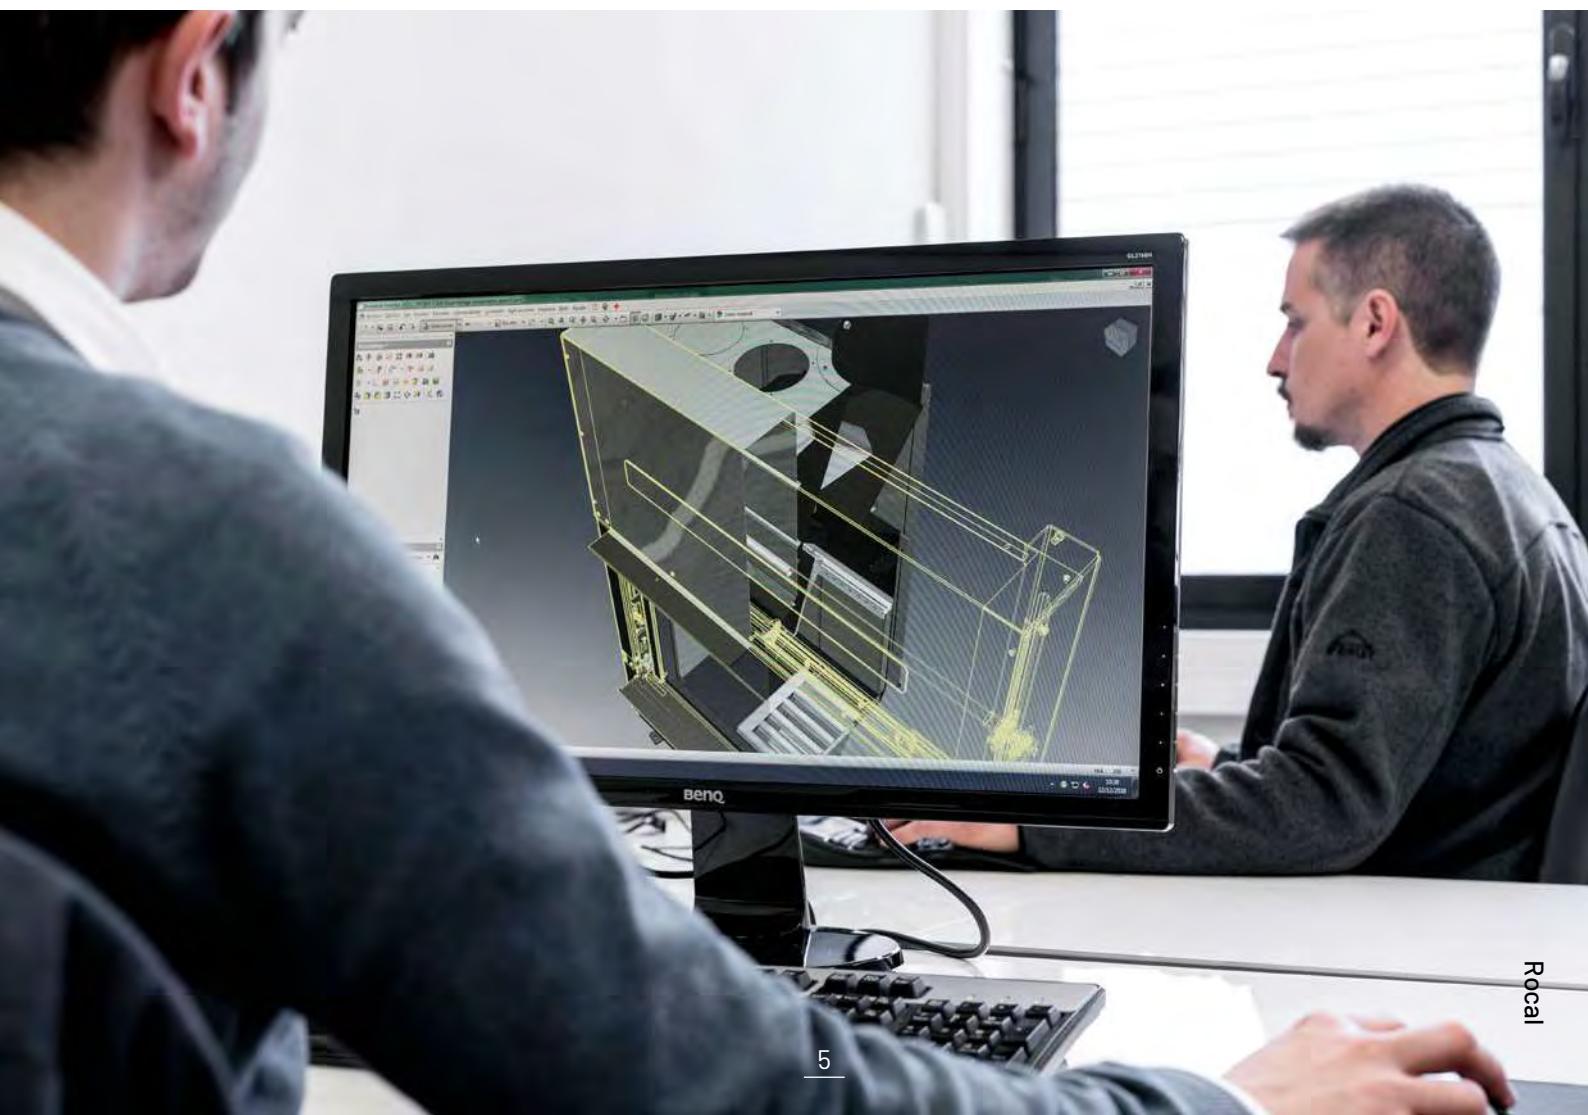

Our distributors are stores specializing in the sale of biomass heating systems that offer advice prior to installation, as well as during and after.

One of our most important goals is to ensure that our products provide maximum efficiency and safety to your home, and we rely on our professional distributors to make the process a success and fully satisfactory for you.

## Quality and design

Rocal offers a wide range of products for you to choose the one that best suits your home. Our stoves are the result of hi-tech manufacturing methods combined with handcrafted finishes. A process in which every attention is paid to detail and only the highest quality materials are used.

We aim to provide functional design that is pleasing to the eye. We want our products to fit in with your projects.

# Innovation and efficiency

We are committed to continuous product improvement, innovation and efficiency, and that has put our range right out in front. We use the latest technology to achieve optimal

performance with minimal emissions, which also means considerable fuel savings.

## EU Ecodesign Commitment 2015/1185

Since January 2022, the European Union has complied with the **Ecodesign** regulation for all wood-burning appliances. This regulation guarantees greater energy efficiency, as well as

a low emission of CO<sub>2</sub> and other polluting gases. In this catalog you will find all the updated products with the certification in force.

Ecodesign  
UE 2015/1185

# How to choose your Rocal experience

## What fire do I need?

It is normal to have questions about which appliance to put in your home, here is some basic information to help you choose your ideal fireplace:

### Heat recovery

I am looking for high efficiency and to complement my home heating system.

#### G Series

It offers comfort and pleasure (sliding door for greater comfort, spacious combustion chamber, total fire vision, **only for new construction**, optional fans)

#### Inserts

They offer high performance and practicality, good value for money (includes fans, need less space because they are compact, can be **inserted into an existing fire or new construction**).

### Advantages of a heat recovery

Taking advantage of Wood burning to heat my room + other parts of the house.

It can be built into any space and decorated to suit your rooms decor.

I have an inefficient open fire → **we recommend an Insert**

I have new construction → **You can choose between Insert or G Series**

### Design stoves / forced ventilation stoves

**I want an exclusive fire that brings distinction to my home and a personal touch**

Design fires: These heat by radiation, (working as a radiator), it only heats the room where the fireplace is located.

The fire is the central point of attention, its highlights its originality.

**I'm searching a stove with forced ventilation for extra efficiency**

The Habit range is ideal for you. Our contemporary stoves meet the requirement of modern design but seek to heat the room faster than a natural convection fireplace, since with forced ventilation it distributes heat more quickly.

### Ecofriendly

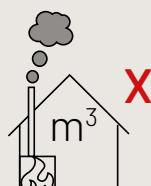

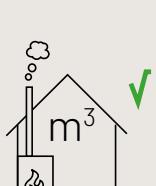

In general terms I want my choice to be "**ecofriendly**", meaning to be respectful with the environment. All our fireplaces are "ecofriendly" because we seek excellence in combustion to make it clean and efficient. In addition to a lower consumption that therefore allows considerable energy savings for me and the environment.

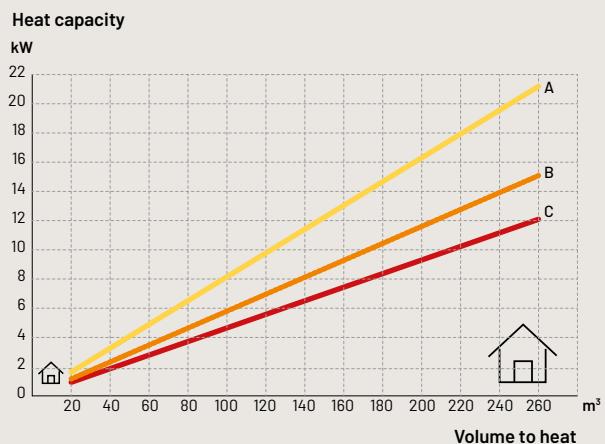

### How do I know how many KW do I need?

A higher **performance**, more heat for **less fuel**.

Recommendation: do not choose a capacity that is too high for real needs, since there is a risk of having to use the fireplace or stove at a lower power than recommended, to do not overheat the room, which would lead to combustion low and therefore higher emissions.

- C  
Good insulation: Double Glazed Windows and Cavity Wall Insulation.
- B  
Simple insulation: Single Glazed Windows and Cavity Wall Insulation..
- A  
Without Insulation: Simple window and simple wall.

# WOOD

## Wood

Wood is an ecological, economical biomass fuel. A natural fuel that man has used since time began. It is the renewable energy source par excellence. Using wood instead of fossil fuels reduces the greenhouse effect, as it does not increase the carbon dioxide in the atmosphere. Furthermore, wood is easy to find,

relatively cheap to obtain and contributes to clearing the forest floor.

Don't forget that wood burns slowly and elegantly and provides that special touch that makes a house a home.

WOOD

Rocai

# 01.

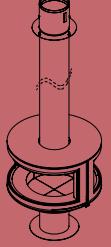

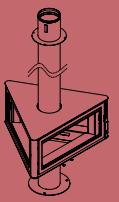

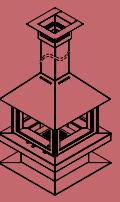

## Design Freestanding Stoves

Our Freestanding stoves are distinguished by their balanced design and excellent hand-crafted finishes that doesn't avoid technology, which enables us to achieve excellent performance in terms of efficiency, output and minimum particle emision.

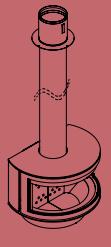

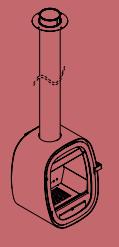

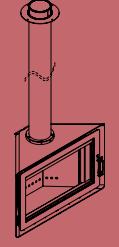

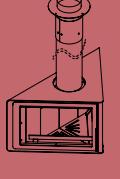

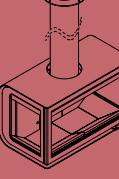

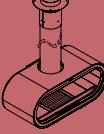

We use the most appropriate material for each part of the stove (steel, stainless steel, vermiculite, fire brick...), along with heat resistant paint for the outer finish.

We make versions to suit any space in your home.

# Hebar

NEW

Hebar is one of the most complete and efficient products on the market and thanks to its high efficiency, it also has the ability to heat a large area. The same inertia of the stove keeps the heat for cooking in the oven until about 3 hours after the last loading.

## STOVE AND BARBECUE FEATURES:

- Vermiculite inner lining.
- Steel combustion chamber.
- Optional external air inlet.
- Preheated primary and secondary air.
- Tertiary or security air.
- Ash pan removal from the front.
- Stainless steel grill.
- Two fans unit with two automatic speed settings and one manual.
- Can be supplied without fans unit on request.

## OVEN FEATURES:

- Stainless steel oven interior with shiny finish.
- Steel grill and stainless steel tray.
- Capacity: 65 liters.
- Compartment inside the oven for cleaning the flue.
- Thermometer included.

**G450 LI**

# G450 TC + plus

## FEATURES

Side-opening sliding door with opening of the side glasses, the front glass is fixed (to more easily clean the glass).  
 Steel combustion chamber.  
 Vermiculite inner lining and refractory base.  
 Wraparound casing with optional hot air conduction.  
 Primary and secondary combustion air.  
 Ash pan removal from above or below.  
 Optional external air intake.  
 Preheated primary and secondary air.  
 Tertiary and/or back-up air.  
 Double deflector: three-position superior deflector for adjustable flow.

## OPTIONAL ITEMS

**A 2082** ventilation unit.  
 4-cm frame.

## FITTING ACCESSORIES

Inlet/outlet diffuser vents.  
 Wood store.  
 Diffuser vent with hinged inlet

More details: Pages 86 - 89

G450 TC

# General features

Vermiculite inner lining and refractory base.

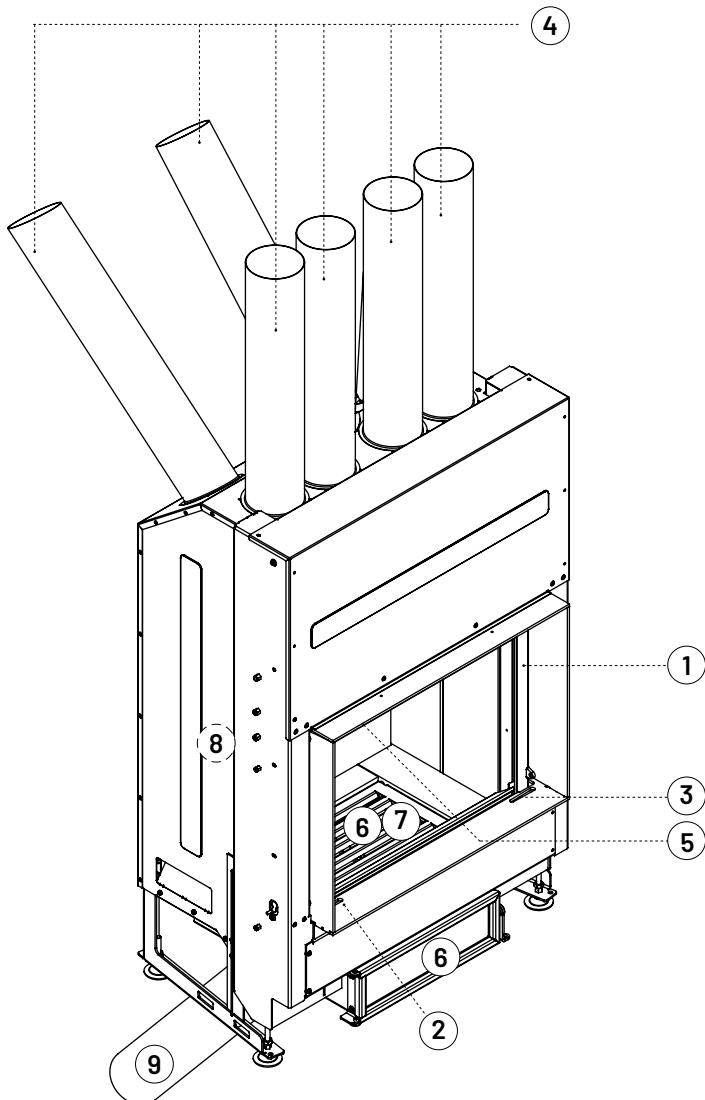

Adjustable, levelling stand.

Sliding and drop down door (for glass cleaning).

For the G300LI / LI or G450LD / LI model, both doors open

On the TC model, only the side doors are opened, the front one remains fixed.

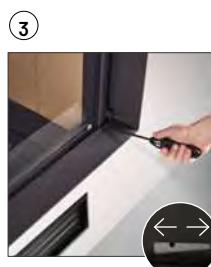

**2**  
Primary control.  
Mechanism that provides oxygen for combustion through the fire grille.

**4**  
Wraparound casing with optional hot air conduction.  
Conducts the hot air to the room itself or other rooms in the house.

**7**  
Ash pan removal from above.

**3**  
Secondary control.  
Mechanism that provides oxygen for combustion, by means of double combustion and the upper part of the glass.

**5**  
Tertiary or safety air. Makes an extra contribution of oxygen that enables the combustion gases to burn better.

**8**  
Steel combustion chamber.  
The high robustness of the combustion chamber ensures the long life of these devices.

**6**  
Air inlet for the fan to duct (right or left)

**9**  
Ash pan removal from above or below.

**External air inlet.**  
Guarantees that the air in the house is healthier. Does not interfere with domestic air extraction devices, such as those in the kitchen and bathroom.

# Optional items

## VENTILATION KITS:

Ventilation kits increase the performance of the device and, when hot air is channelled, they distribute the air better to other parts of the house.

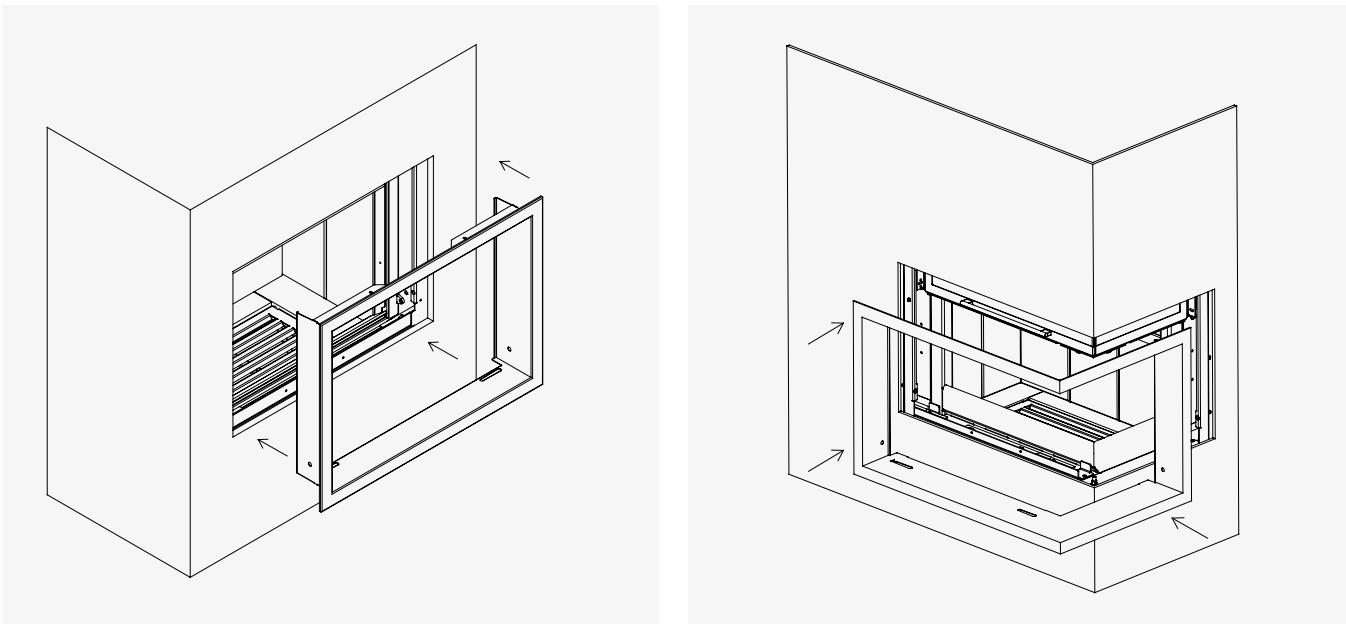

**A2082** Ventilation kit with a 680 m<sup>3</sup>/h tangential turbine. Thermostat and flow regulator with speed settings. (For all models except G450DC)

## +Plus

Twinwall pipe for gas cooling. This supplement increases the performance and efficiency of the product, in addition, decreases the particles, NOX and OGC.

## DECORATIVE FRAME 4cm and 10cm:

Option to finish the final appearance of the insert by adding a frame.

4-cm frame (optional).  
10-cm frame (optional)

4-cm frame (optional)  
G300 LD/ LI, G450 LD/ LI.

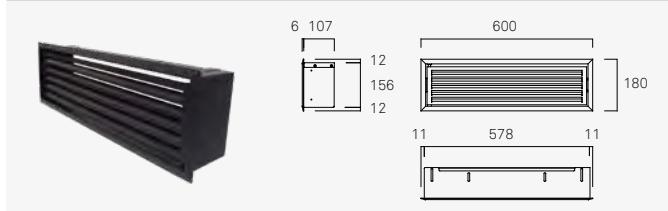

# Fitting accessories

Our range of fitting accessories makes home installation easier and helps you achieve the right look.

## DIFFUSER VENTS

With the aim of providing solutions when inserts and fireplaces are fitted in completed buildings, we have created a range of diffuser vents that ensure proper convection-air inlet and outlet, i.e. the proper venting of the hearth, and help to integrate these components, which can be difficult to add..

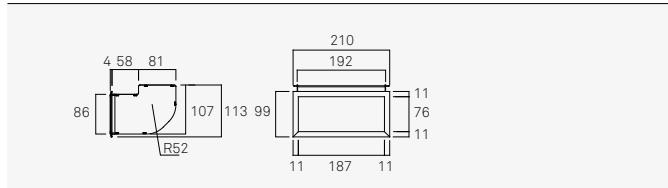

**C4000** Diffuser vent with hinged inlet

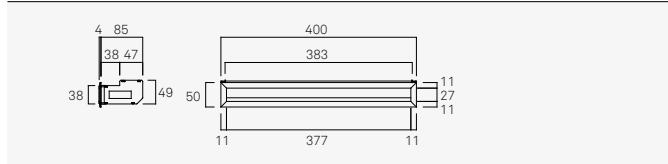

INLET DIFFUSER

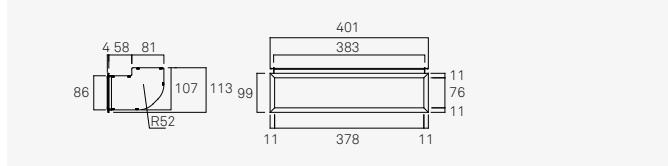

**D0000** Single air inlet diffuser vent

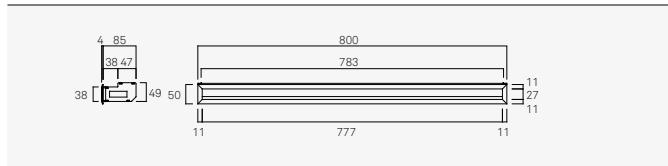

**D0002** Single air inlet diffuser vent

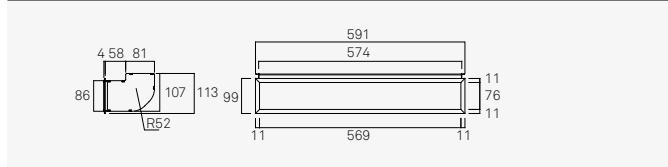

**D0005** Double air inlet diffuser vent

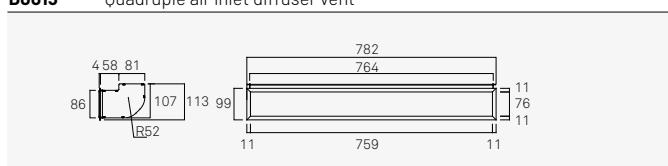

**D0007** Double air inlet diffuser vent

**D0010** Triple air inlet diffuser vent

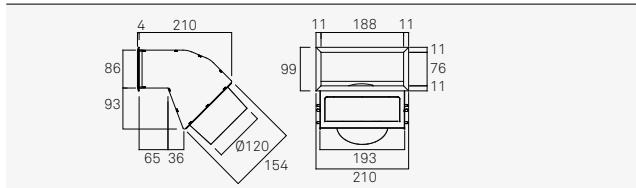

**D0015** Quadruple air inlet diffuser vent

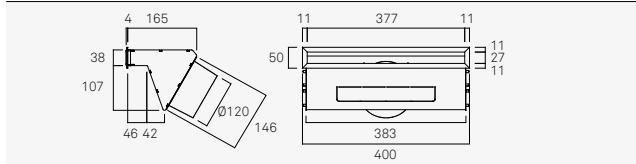

OUTLET DIFFUSER

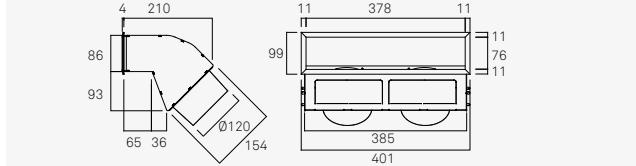

**D1000** Single air outlet diffuser vent

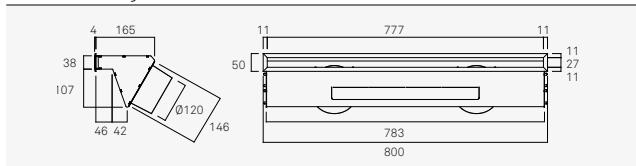

**D1002** Single air outlet diffuser vent

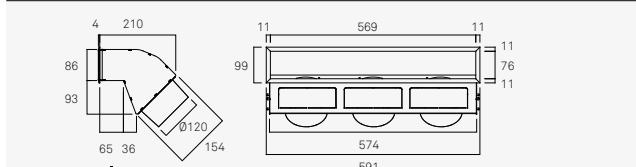

**D1005** Double air outlet diffuser vent

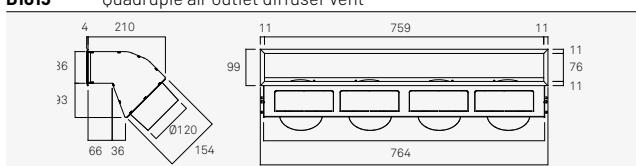

**D1007** Single air outlet diffuser vent

**D1010** Triple air outlet diffuser vent

**D1015** Quadruple air outlet diffuser vent

**LOG STORE**

An ideal space for storing logs.

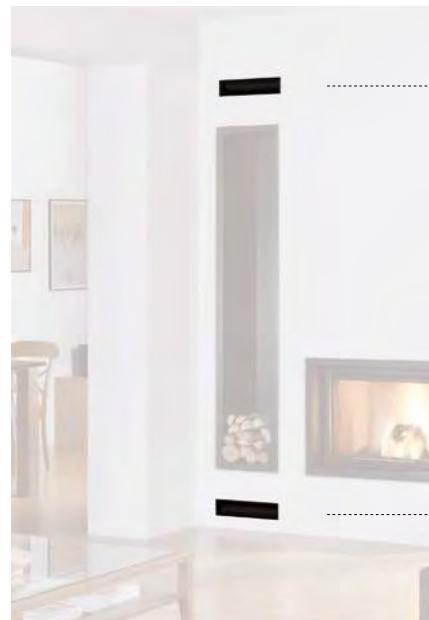

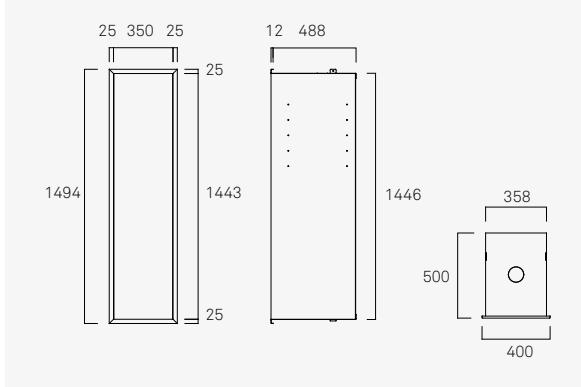

Cut-outs for three shelves and light in upper section.

**Optional items**

**C1000** Steel black shelf

**C1000** Wood store

Outlet diffuser vent

Wood store

# 04.

## Inserts

Inserts act as heat recoverers. They are designed to be inserted in existing or new built fireplaces, achieving excellent efficiency and output.

Thanks to their forced fans system, air circulates in a way that optimises heat distribution, thus reaching an ideal temperature and covering a larger area.

**+Plus**

**Built-in**

**Separate box**

Twinwall pipe for gas cooling. This supplement increases the performance and efficiency of the product, in addition, decreases the particles, NOX and OGC.

**Adjustable fan speed control:**

Speed adjustment with 9 positions.  
With four preprogrammed modes.  
Compatible with G series modules and ARc Inserts.

**Adjustable fan speed control:**

Speed adjustment with 12 positions.  
With four preprogrammed modes.  
Compatible with G series modules and ARc Inserts.

# RCr

## FEATURES

Reversible front door.  
Steel combustion chamber.  
Vermiculite lining.  
Wrap-around casing and optional hot air conduction.  
Air direction control from front or above.  
Primary and secondary register.  
Screen-printed glass.  
Tertiary or security air.  
Exterior air shut-off valve.  
External air inlet not sealed.  
Triple baffle.  
Ash pan removal from front.  
2- or 4 fans unit with 2 automatic speed settings and 1 manual.

## OPTIONAL ITEMS

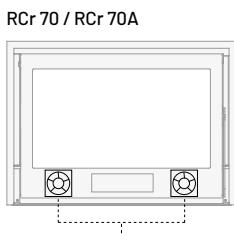

Adaptor for standard 4-sided frame.  
Decorative frames, 10 cm.  
Adjustable, levelling stand.

## FITTING ACCESSORIES

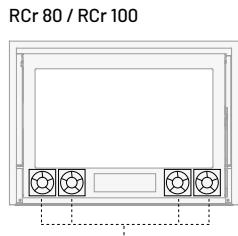

Inlet/outlet diffuser vents.  
Wood store.

T3000 External air inlet damper

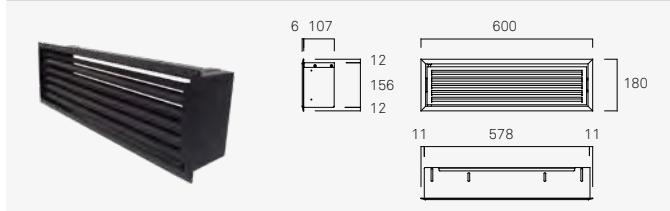

# Fitting accessories

Our range of fitting accessories makes home installation easier and helps you achieve the right look.

## DIFFUSER VENTS

With the aim of providing solutions when inserts and fireplaces are fitted in completed buildings, we have created a range of diffuser vents that ensure proper convection-air inlet and outlet, i.e. the proper venting of the hearth, and help to integrate these components, which can be difficult to add..

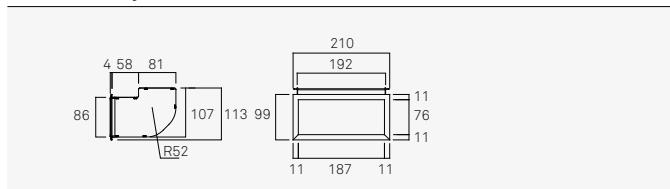

**C4000** Diffuser vent with hinged inlet

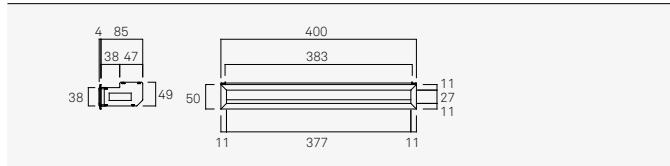

INLET DIFFUSER

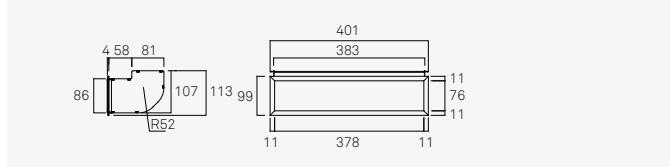

**D0000** Single air inlet diffuser vent

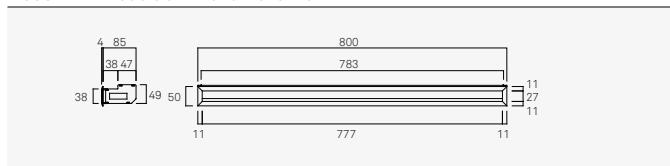

**D0002** Single air inlet diffuser vent

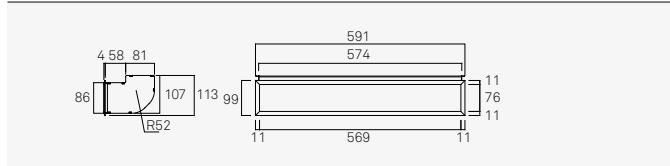

**D0005** Double air inlet diffuser vent

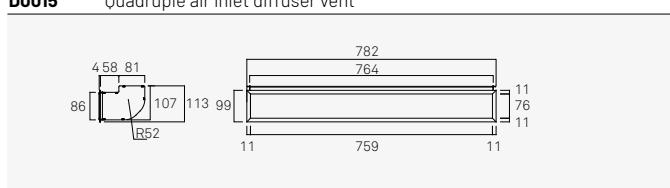

**D0007** Double air inlet diffuser vent

**D0010** Triple air inlet diffuser vent

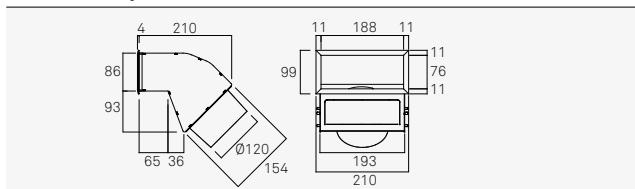

**D0015** Quadruple air inlet diffuser vent

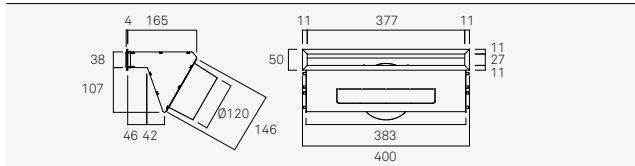

OUTLET DIFFUSER

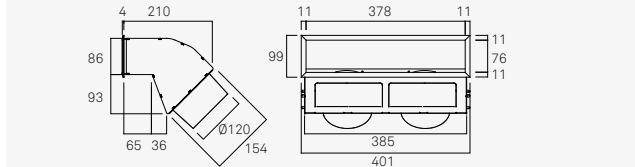

**D1000** Single air outlet diffuser vent

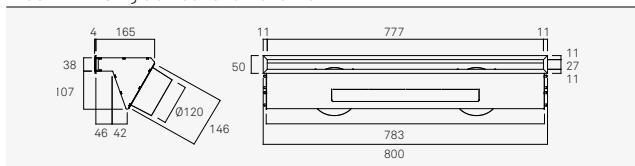

**D1002** Single air outlet diffuser vent

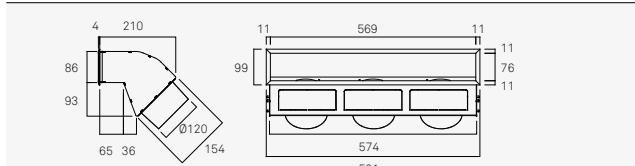

**D1005** Double air outlet diffuser vent

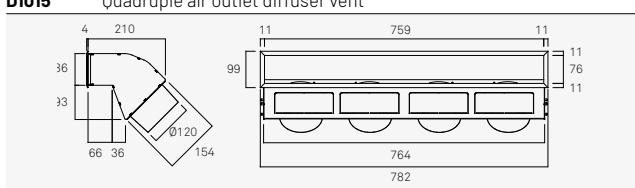

**D1007** Single air outlet diffuser vent

**D1010** Triple air outlet diffuser vent

**D1015** Quadruple air outlet diffuser vent

**LOG STORE**

An ideal space for storing logs.

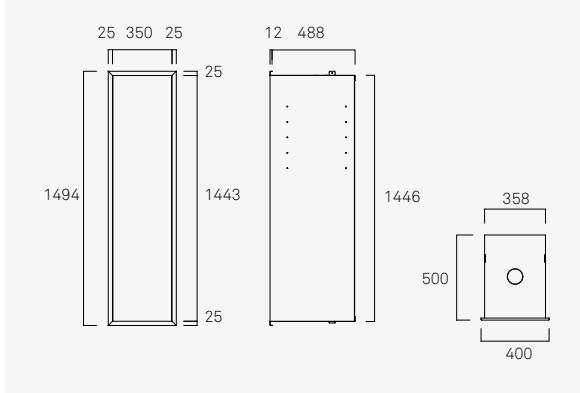

Cut-outs for three shelves and light in upper section.

**Optional items**

**C1000** Steel black shelf

**C1000** Wood store

Outlet diffuser vent

Wood store

# GAS

## Gas

Our priority is to offer improvements and alternatives constantly, we developed a range of Gas fireplaces with the exclusive designs of our brand. Gas represents a plus of comfort and quality for many homes; allows us to enjoy instant fire in a

simple and safe way. In addition, Gas is the perfect option for urban spaces or with regulations where firewood is excluded.

# 01.

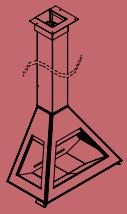

# Design Freestanding Stoves

Our gas fireplaces are the perfect experience to enjoy the pleasure of firewood with the comfort of gas technology. We have adapted our most iconic designs to offer the unique and exclusive Rocal touch.

Our faithful commitment to firewood has prompted us to develop a range of gas fireplaces that have the same charm

of real fire. Our priority is to provide a maximum of reality to create the same effect as firewood. All of our designs have been certified and operate using a balanced flue system for greater security. Our intention is to gradually increase this selection and offer more gas Rocal models in the future.

# Drop Gas

Balanced flue gas fireplace with frontal view. Thanks to its burner with advanced technology gives us an excellent consistent performance and efficiency. The lighting of the fire and flame modulation are controlled by the system RC Symax. A realistic flame effect even at low intensity,

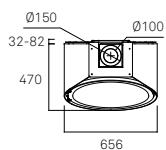

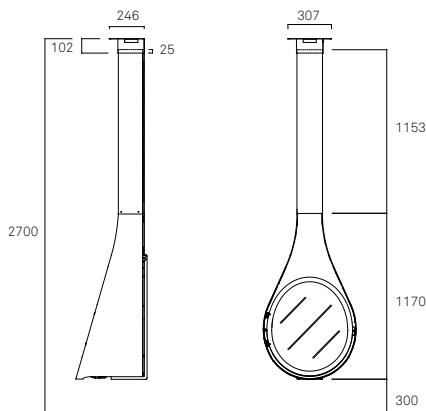

## FEATURES

Natural Gas or Propane  
Balanced flue combustion  
Remote control  
Only possible with ceramic logs  
Steel and vermiculite interior  
Connection tube 150/100  
System with double fire sensor for greater security  
Includes 220V power adapter

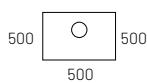

The height of the flame is lower in the case of propane appliances.  
Check final values with your distributor.
