

Espoo Floor & Ceiling

Decoflame - Danish Design since 2008

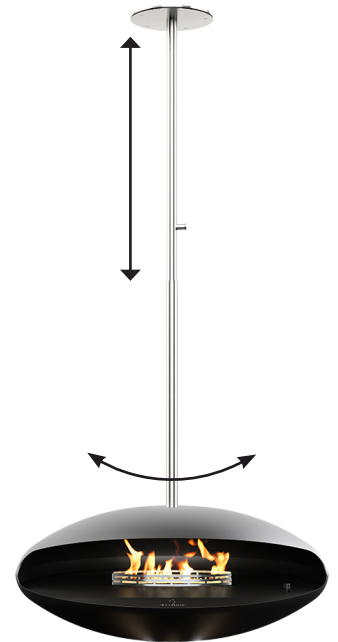

**Espoo Floor -
Oak legs**

**Espoo Floor -
Stainless steel base**

**Espoo Ceiling -
Telescopic ceiling rod**

Espoo bio fireplace combines classic design with solid quality to create a warm and inviting atmosphere in the home. The range consists of three models - one ceiling model and two floor models - developed with a focus on functionality and safety without compromising on timeless aesthetics.

The electronic filling system ensures precise and drip-free filling, minimising the risk of spillage. A built-in sensor monitors the burner temperature and prevents refuelling if the tank is too hot.

The floor model with beautiful oak legs adds a natural and classic look to the room, while the stainless steel base adds a clean and simple design.

The ceiling model is equipped with an adjustable telescopic function that makes it possible to customise the height. It can also rotated 360° so that the flames can be enjoyed from all angles.

With classic design and uncompromising quality, the Espoo is a timeless investment - created to spread cosiness in the home for many years to come.

Technical information:

- Capacity: Max. 2.4 litres
- Burning time: Max. 5-10 hours.
(Depends on intensity)
